3/28/09 MONTVALE 5 & 10 MILER R NUTS POINTS

Alright, I've updated the results for the series (you'd be surprised how much time I've spent working on the easiest way to handle this, and I'd be embarrassed to tell you). I started recording things in a different way than the first results posted to the website. Below are the mixed results for the "short" and "long" race according to points. I have placed the top 3 overall winners into their respective age group category for ease of point tracking in case they lose their grasp on their overall lead (this was not done in the previous results). Series entrants are highlighted in gray and the top three overall are in red. In addition, I am still getting R NUTS entries and will be adding them to the results as they come in, so places may change as people decide to join the series.

As you look over the results you will notice that the top 3 finishers in the "long" race will acquire more points than the 1st place finisher in the "short" race. And, although the 3rd place finisher in the "long" race and the 1st place finisher in the "short" race both get 20 points, the "long" race wins (this also occurs at 10 points also). This is done to award the longer distance with more points, to motivate runners to push their previous limits and try a longer race, and to create a "game" where you have to figure out which race will give you the most "bang" for your mile.

We have one series entrant that has had a birthday, and entered a different category, since the Explore Park race. His category will be the one he was in at the Explore Park race.

At this point I think I have accurate results posted. If you see an error or need me to explain my mathematical madness, please send me a note. I do not claim to be perfect, but I will claim to have an anal, attention to detail.
